COACH*

Product presentation (max 100 words)

FH:01 COACH, designed for fitment of all axles, provides :

Safety: 3PMSF marking and B wet grip class deliver outstanding traction and maximize performance in all weather conditions, for higher safety standard.

Efficiency: the low rolling resistance (B rolling class, EU Label) guarantees less fuel consumption and high mileage. **Higher load capacity** to comply with new electric vehicles:

up to 8 tons on front axle for 295/80R22.5

up to 8,5 tons on front axle for 315/80R22.5

Comfort: the low noise levels and the optimized tread pattern design enhance comfort for both the driver and the passengers.

Description of application (50-70 words)

Specifically designed for comfort and safety in passenger transport, over medium and long distances

Product Feature (50-70 words)

- The specific tread design is optimized to grant excellent steer handling and good traction.
- The innovative wave sipes enhance handling, snow grip performance (M+S, 3PMSF markings) to offer exceptional performance in all weather conditions.
- The optimized tread pattern design promotes lower noise emission
- The RSR Rotated Shoulder Rib (Pirelli patent) allows a correct distribution of footprint contact pressure, thus ensuring optimal even wear and high mileage.
